September 28, 2010

To whom it may concern,

We worked with the Natural Green Grass Patch and Mike Dohrman on our recent practice field painting project. While it was not the traditional use of the product, Mike was very helpful in finding a way to get the results we desired and we were very pleased with those result. The Grass Paint worked very well and had great coverage. We actually used much less paint than we anticipated to get the blue field we wanted.

I have had several inquiries into the product we used, mostly of Boise State fans wanting to paint their lawns in support of their school. The grass paint worked great for us and we would definitely use it again if the need arose.

Sincerely,

*John Cheney*
