## Technical Information

### Product: Grass Patch

**Description: Green pigment colorant for grass, lawn, divot sand and turf.**

The Grass Patch is a specialty pigment formulation engineered specifically for turf and grass. The Grass Patch is ideal for Home Owners/residential, commercial, pet owners, athletic greens and golf courses. Grass Patch is non-toxic and non-hazardous and is environmentally friendly. The Grass Patch will not harm plants, grass, pets or humans. The Grass Patch is a great way to quickly improve curb appeal of a property, by giving the property lush green grass, compared to unattractive brown lawns or brown spots. The Grass Patch is easily applied with most light or heavy duty sprayers. Grass Patch comes in both a concentrate and a ready-to-use.

### **Applications:**

The Grass Patch is an environmentally friendly grass, lawn or turf paint that can be used in a variety of applications. The Grass Patch is regularly used by:

1. Golf Courses/Divot Sand - Grass Patch is used to color greens for a consistent look year round. Grass Patch is used to color Divot sand throughout the entire golf course.

2. Homeowners - Grass Patch is used for dormant grass, over fertilization and during times of drought.
3. Athletic Fields - The Grass Patch is perfect for soccer and football fields.
4. Commercial - Have your business stand out from the rest. Studies have shown that commercial properties with great curb appeal attract more customers.
5. Pet Owners - Perfect to cover up those brown spots left behind from the dog's urine.
6. Weddings - Few days require aesthetic perfection like that of a wedding day.
7. Photographers - Don't let an unsightly spot in the grass become the focal point of an otherwise great photograph.
8. Property Management - Our grass colorant is the fastest way to improve curb appeal.
9. Movie Studios/Movie Sets - Production companies use the Grass Patch to create the perfect scene.

#### Benefits of the Grass Patch:

1. Instant Results - Just spray it on and the brown is gone! Once the product dries it will remain on the grass blades until it is mowed or fades away.
2. Why Ours Is The Best - Our Grass Paint is formulated with a pigment based solution, not a dye, ensuring it will hold its color longer and fade more naturally than traditional dye based turf dye's. Independent tests have shown our products to withstand the harsh sun, and remain the desired green color longer than any other products on the market.
3. Our turf paint comes in a variety of sizes for homeowners and contractors. Our paint is available in concentrate or ready to use form.
4. The green color works very well with almost any type of grass.
5. Protect From Harsh Winters - The paint acts as a protective barrier for the grass. The paint helps absorb sunlight, making the soil temperatures underneath warmer than unpainted areas. This protects the root, and has the grass better equipped to "green up" on its own sooner than normal come spring.
6. Healthy For Grass - The paint contains a slight amount of ammonia, which breaks down into nitrogen, which is a natural fertilizer for grass. While it's not like applying straight fertilizer, it differently is a healthier way to go for your lawn. The process of over-seeding is actually unhealthy for the grass, as the grass has to compete with the rye for nutrients. Rye grass also shades the dormant grass underneath, preventing it from getting the sunlight it needs.
7. Grass paint allows for better playability on golf courses by reducing the excessive water usage in the fall to assist in seed germination for over-seeding.
8. Grass Patch Conserves Water

#### **Directions for Usage:**

1. Shake well before use.
2. Apply when the grass is dry and rain is not expected for at least 24 hours.
3. Product normally dries within 2-3 hours, but depending on the weather condition in different states, the drying time can vary.
4. Contents will stain, so it is recommended to avoid getting it on skin or clothing.
5. For best results, mow lawn to normal height.
6. Apply product with any conventional weed sprayer, compression sprayer, spray bottle and airless paint sprayer.

**Coverage Rates:**

(Based on 1 gallon of concentrate) Some testing may be required to achieve desired color based on the following dilution ratios. Coverage rates may vary depending on condition, density of grass and desired color. All ready-to-use products are mixed at a 12:1 ratio.

<u>Dilution Ratio:</u>	<u>Coverage Area:</u>
8:1.....	2100-2800 sq. ft
10:1.....	2700-3600 sq. ft
12:1.....	3300-4400 sq. ft
15:1.....	3900-5200 sq. ft
1:1.....	Divot Mix

**Storage:**

1. Do not let the product freeze. Store in a cool dry area.
2. Properly dispose of empty containers.
3. Do not reuse.
4. Close cap tightly after each use.
5. Keep out of reach of children.
6. (32oz spray bottle) To prevent clogging during storage, clear nozzle after every use and turn nozzle to the off position.

**Clean up:**

1. Clean hands and tools with warm soapy water.
2. Clean spills right away with a damp cloth.

**Caution:**

Keep out of reach of children. Do not take internally. May cause eye irritation. Do not spray in eyes, on skin or on clothing. Use product with adequate ventilation outdoors only. In case of eye contact, immediately rinse eyes thoroughly with plenty of water. Remove any contact lenses and continue rinsing eyes for at least 15 minutes. Get immediate medical attention. If contact with skins occurs, wash area with soap and water. A spray shield is recommended for applications if overspray or drift is a potential problem.

Notice: Buyer assumes all responsibility for safety and use not in accordance with direction. The manufacturer neither assumes nor authorizes any person to assume for it any other liability in connection with the sale or use of this product.
